

## Kent Train Station Renovation

Kent, Connecticut

**Scope:**

**Area:** 2,500 sf

**Completion:** May 2001

**Cost:** \$500,000

Originally built in 1843 as a passenger train station in rural Kent, Connecticut this unique building was renovated to become medical offices. The total renovation included necessary mechanical and electrical updates to allow it to function efficiently while preserving the historic integrity of its original purpose.

The building's character was preserved in the new design by incorporating a 'Railroad' style floor plan, lighting and finish selections reminiscent of the time.
